No. 2a Knock-Out

- (1) If the Observation Price of the Underlying (No. 5 (2) of the Issue Specific Conditions) expressed in the Reference Currency is equal to or falls below (Mini Long) or is equal to or exceeds (Mini Short) the Knock-Out Barrier (No. 2b (2) of the Issue Specific Conditions) of the Warrant (the **"Knock-Out Event"**) during the Observation Period (No. 2 (3) of the Issue Specific Conditions) during the Observation Hours (No. 5 (2) of the Issue Specific Conditions) at any time (referred to in the following as the **"Knock-Out Time"**), the term of the Warrants shall end early at the Knock-Out Time. If the Stop-Loss Cash Amount in accordance with paragraph (2) of this No. 2a is positive, the Warrant Holder shall receive the Stop-Loss Cash Amount. The Issuer will give notice without delay in accordance with No. 4 of the General Conditions that the Observation Price of the Underlying has reached or fallen below (Mini Long) or reached or exceeded (Mini Short) the Knock-Out Barrier.
- (2) If the term of the Warrants ends early as a result of a Knock-Out Event, the Issuer shall pay any Stop-Loss Cash Amount to the Warrant Holders.

The **"Stop-Loss Cash Amount"** shall be either the Stop-Loss Intrinsic Value, if the latter is already expressed in the Settlement Currency, or the Stop-Loss Intrinsic Value converted into the Settlement Currency using the Stop-Loss Exchange Rate.

The **"Stop-Loss Intrinsic Value"** shall be the difference, expressed in the Reference Currency and multiplied by the Multiplier, by which the Hedge Price is higher than (Mini Long) or lower than (Mini Short) the Strike.

The **"Hedge Price"** shall be a price determined by the Issuer in its reasonable discretion within 120 minutes following the occurrence of the Knock-Out Time as the level of the Underlying in line with the market, calculated taking into account the calculated proceeds from unwinding the corresponding hedging transactions. For this purpose, the Hedge Price shall be at least equal to the lowest (Mini Long) or highest (Mini Short) price of the Underlying determined within 120 minutes following the occurrence of the Knock-Out Time.

The "**Stop-Loss Exchange Rate**" shall be the exchange rate determined by the Issuer in its reasonable discretion within a maximum of 120 minutes following the occurrence of the Knock-Out Time in place of the Reference Rate for Currency Conversion.

In the event that the Knock-Out Time occurs less than 120 minutes before the end of the normal trading hours of the Underlying, the time available in accordance with the preceding paragraph for the determination of the Hedge Price shall be extended accordingly from the start of the next following exchange session.

If Market Disruption Events within the meaning of No. 7 of the Issue Specific Conditions occur during the time available to the Issuer for the determination of the Hedge Price and if the Issuer has not yet determined the Hedge Price when the Market Disruption Events occur, the time available for the determination of the Hedge Price shall be extended for the duration of the Market Disruption Events. The right of the Issuer to determine the Hedge Price or the Stop-Loss Exchange Rate shall continue to apply during the existence of Market Disruption Events.

If the Market Disruption Events within the meaning of No. 7 of the Issue Specific Conditions continue to exist until the end of the fifth Banking Day in Frankfurt am Main, at the Auxiliary Location and at the location of the Relevant Exchange following the next Exercise Date for the Warrants and if the Issuer has not yet determined the Hedge Price, the Issuer shall determine the Hedge Price in its reasonable discretion taking into account the market conditions prevailing on that day.

The payment of any Stop-Loss Cash Amount shall be made in accordance with No. 3 (4) of the Issue Specific Conditions, with the proviso that the Stop-Loss Payment Date shall be no later than the fifth Banking Day in Frankfurt am Main and at the location of the Depository Agent following the determination of the Hedge Price.

No. 2b

Adjustment Amount

- (1) The respective "**Strike**" of a series shall be equal on the Issue Date to the value specified in Table 1 of the Annex to the Issue Specific Conditions. Subsequently, the Strike shall be adjusted on each calendar day during a Financing Level Adjustment Period by the Adjustment Amount calculated by the Issuer for that relevant calendar day. The Adjustment Amount for the Warrants may vary. The "**Adjustment Amount**" of a series applying for each calendar day during the respective Financing Level Adjustment Period shall be equal to the result obtained by multiplying the Strike applying on the Adjustment Date falling in that Financing Level Adjustment Period by the Adjustment Rate applicable in that Financing Level Adjustment Period and converted to the amount for one calendar day using the actual/360 day count convention. The resulting Strike for each calendar day shall be rounded to at least four decimal places in accordance with standard commercial practice, but the calculation of the next following Strike in each case shall be based on the unrounded Strike for the preceding day. The calculations for the first Financing Level Adjustment Period shall be based on the Strike on the Issue Date. The relevant Strike for each calendar day shall be published on the Issuer's Website.

- (2) The respective "**Knock-Out Barrier**" of a series for the first Financing Level Adjustment Period shall be equal to the value specified in Table 1 of the Annex to the Issue Specific Conditions. For each subsequent Financing Level Adjustment Period, the Knock-Out Barrier shall be determined by the Issuer in its reasonable discretion on the Adjustment Date falling in that Financing Level Adjustment Period, taking into account the market conditions prevailing in each case (in particular taking into account volatility).

In addition, the Issuer shall have the right, on days on which, in the determination of the Issuer, the Strike after Adjustment (in accordance with paragraph (1) of this No. 2b) would be equal to, fall below or exceed the Knock-Out Barrier respectively, to adjust the Knock-Out Barrier in its reasonable discretion at the same time as the Adjustment of the Strike, taking into account the market conditions prevailing in each case (in particular taking into account volatility).

The relevant Knock-Out Barrier for each calendar day shall be published on the Issuer's Website.

- (3) In the event of dividend payments or other cash distributions equivalent to dividend payments in respect of the Underlying (applicable in the case of shares as the Underlying) or in respect of the shares on which the Underlying is based (applicable in the case of stock indices as the Underlying), the Strike applying in each case and, where relevant, the Knock-Out Barrier shall be adjusted in accordance with No. 2 (3) of the Issue Specific Conditions (Adjustment due to Dividend Payments).

In the event of any Adjustment due to Dividend Payments in respect of a dividend on the shares of an entity formed or incorporated in the United States (a "**U.S. Dividend**"), the Issuer shall calculate an amount (the "**U.S. Dividend Withholding Amount**") that, together with the net dividend amount reflected in the adjustment, equals 100 per cent of the gross amount of such U.S. Dividend. At the time each such U.S. Dividend is paid, the U.S. Dividend Withholding Amount is deemed to be paid to the Warrant Holder in respect of the Warrants, whereas it shall actually be withheld by the Issuer and deposited with the United States Internal Revenue Service (the "**IRS**").

No. 3

Exercise of the Option Rights

Citibank Europe plc, DCC Settlements, FAO Warrants Team (ESES), 1st Floor, Citi, 1

- to the Issuer crediting its account No. 186 at Euroclear France, account nature 51 or its account No. 67098 at Clearstream Luxembourg.

The Exercise Notice must specify:

- the ISIN (International Securities Identification Number) of the Warrant series and the number of Warrants intended to be exercised and
 - the account of the Warrant Holder with a bank in France into which the Cash Amount is to be paid. If the Exercise Notice does not specify an account or specifies an account outside France, a check for the Cash Amount will be sent to the Warrant Holder at his risk by normal post to the address given in the Exercise Notice within five (5) Banking Days in Paris and Frankfurt am Main following the Valuation Date.
 - Confirmation must also be given that (1) the Warrant Holder is not a U.S. Person (as defined in Regulation S and under CFTC regulation 23.160, and the CFTC's "Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations" as published by the CFTC on 26 July 2013 (78 Fed. Reg. 45292, the "**Interpretive Guidance**")), (2) he is not an Affiliate Conduit, based upon the relevant guidance in the Interpretive Guidance, including the Affiliate Conduit Factors as defined therein and (3) he is not, nor are any obligations owed by him, supported by any guarantee other than any guarantee provided by a person who does not fall within any of the U.S. Person Categories (as defined in the Interpretive Guidance) and who would not otherwise be deemed a "U.S. person" under the Interpretive Guidance.
- (2) The Exercise Notice shall become effective on the Exercise Date according to No. 2 (3) of the Issue Specific Conditions. The Exercise Notice may not be revoked, including during the period prior to the date on which it becomes effective. All of the preconditions set out in No. 3 (1) of the Issue Specific Conditions must be satisfied within fifteen (15) Banking Days of the occurrence of the first precondition. In any other circumstances, the Issuer shall have the right to return to the Warrant Holder any performances already made by the Warrant Holder without interest at the Warrant Holder's risk and expense; in this event the Exercise Notice shall not become effective.
- (3) All taxes or other levies that may be incurred in connection with the exercise of the Warrants shall be borne and be paid by the Warrant Holders. The Issuer or the paying agent is entitled to withhold any taxes or other levies from the Cash Amount or other amounts payable to the holder that are to be paid by the Warrant Holder in accordance with the preceding sentence. The exercise or settlement amount shall be paid in the Settlement Currency without a requirement for the Issuer or the Exercise Agent to give notice of any kind.
- (4) The Issuer will transfer any Cash Amount to the Depository Agent on the Payment Date upon Exercise for the credit of the Warrant Holders registered with the Depository Agent at the close of business on the preceding Banking Day at the location of the Depository Agent.

Upon the transfer of the Cash Amount to the Depository Agent, the Issuer shall be released from its payment obligations to the extent of the amount paid. The Depository Agent has given an undertaking to the Issuer to make a corresponding onward transfer.

No. 4

Termination

- (1) The Issuer shall have the right to terminate all of the Warrants of a series during their term with a notice period of 4 weeks by giving notice in accordance with No. 4 of the General Conditions with effect as of the Termination Date specified in the notice (the "**Termination Date**"). Termination in accordance with this No. 4 may not be affected earlier than 3 months after the Issue Date. Each termination notice issued pursuant to this No. 4 is irrevocable and must specify the Termination Date. The Termination shall become effective on the date specified in the announcement of the notice. For the purposes of calculating the Cash Amount in accordance with No. 2 of the Issue Specific Conditions, the date on which the Termination becomes effective shall be deemed to be the Valuation Date within the meaning of these Terms and Conditions.
- (2) In the event of Termination by the Issuer, No. 3 of the Issue Specific Conditions shall not apply. The Exercise Date within the meaning of No. 2 (3) of the Issue Specific Conditions shall in this case be the date on which the Termination becomes effective. The Payment Date shall be the Payment Date upon Termination in accordance with paragraph (3) of this No. 4.
- (3) In this event, the Issuer will transfer the Cash Amount for all of the Warrants affected by the Termination to the Depository Agent within five (5) Banking Days at the registered office of the Issuer and at the location of the Depository Agent after the Termination Date for the credit of the Warrant Holders registered with the Depository Agent on the second day following the Termination Date (referred to in the following as "**Payment Date upon Termination**"). Upon the transfer of the Cash Amount to the Depository Agent, the Issuer shall be released from its payment obligations to the extent of the amount paid.

The Depository Agent has given an undertaking to the Issuer to make a corresponding onward transfer.

In the event that the onward transfer is not possible within three months after the Payment Date upon Termination ("**Presentation Period**"), the Issuer shall be entitled to deposit the relevant amounts with the Frankfurt am Main Local Court for the Warrant Holders at their risk and expense with a waiver of its right to reclaim those amounts. Upon the deposit of the relevant amounts with the Court, the claims of the Warrant Holders against the Issuer shall expire.

Part B. Underlying Specific Conditions

No. 5
Underlying

- (1) The "**Underlying**" shall correspond to the share or security representing shares specified as the Underlying in Table 2 of the Annex to the Issue Specific Conditions of the Company specified in Table 2 of the Annex to the Issue Specific Conditions (the "**Company**").
- (2) The "**Reference Price**" of the Underlying shall correspond to the price specified as the Reference Price of the Underlying in Table 1 of the Annex to the Issue Specific Conditions, as calculated and published on Trading Days on the Relevant Exchange specified in Table 2 of the Annex to the Issue Specific Conditions (the "**Relevant Exchange**"). The "**Observation Price**" of the Underlying shall correspond to the prices for the Underlying calculated and published on an ongoing basis on the Relevant Exchange on Trading Days. "**Observation Hours**" shall be the Trading Hours. "**Trading Days**" shall be days on which the Underlying is normally traded on the Relevant Exchange. "**Trading Hours**" shall be hours during which the Underlying is normally traded on the Relevant Exchange on Trading Days.

No. 6
Adjustments

- (1) If an Adjustment Event pursuant to paragraph (2) of this No. 6 occurs, the Issuer shall determine whether the relevant Adjustment Event has a diluting, concentrative or other effect on the calculated value of the Underlying and, if such is the case, shall if necessary make a corresponding Adjustment to the affected features of the Warrants (referred to in the following as "**Adjustments**"), which in its reasonable discretion is appropriate in order to take account of the diluting, concentrative or other effect and to leave the Warrant Holders as far as possible in the same position in financial terms as they were in before the Adjustment Event took effect. The Adjustments may relate, *inter alia*, to the Strike, the Knock-Out Barrier, the Multiplier and other relevant features, as well as to the replacement of the Underlying by a basket of shares or other assets or, in the event of a merger, by an adjusted number of shares of the absorbing or newly formed company and, where relevant, the specification of a different exchange as the Relevant Exchange and/or a different currency as the Reference Currency. The Issuer may (but is not obliged to) base the determination of this appropriate Adjustment on the adjustment made in response to the relevant Adjustment Event by a futures exchange, on which options or futures contracts on the Underlying are traded at the time of the Adjustment Event, in respect of options or futures contracts on the relevant share traded on that futures exchange.

In the event of an extraordinary dividend on the shares of an entity formed or incorporated in the United States as specified in paragraph (2)(e) of this No. 6, any adjustment in respect of the extraordinary dividend will be calculated by the Issuer net of any withholding tax required to be withheld under Section 871(m) of the U.S. Internal Revenue Code.

- (2) An "**Adjustment Event**" shall be:
- (a) the subdivision (stock split), combination (reverse stock split) or reclassification of the respective shares or the distribution of dividends in the form of bonus shares or stock dividends or a comparable issue;
 - (b) the increase in the capital of the Company by means of the issue of new shares in return for capital contributions, with the grant of a direct or indirect subscription right to its shareholders (capital increase for capital contributions);
 - (c) the increase of the capital of the Company from its own financial resources (capital increase from corporate funds);
 - (d) the grant by the Company to its shareholders of the right to subscribe for bonds or other securities with option or conversion rights (issue of securities with option or conversion rights);
 - (e) the distribution of an extraordinary dividend;
 - (f) the spin-off of a division of the Company in such a way that a new, independent company is formed or the division is absorbed by a third company, with the grant to the shareholders of the Company of shares in either the new company or the absorbing company for no consideration;
 - (g) the permanent delisting of the Underlying on the Relevant Exchange as a result of a merger by absorption or new company formation or for another reason;
 - (h) other comparable events that could have a diluting, concentrative or other effect on the calculated value of the Underlying.
- (3) Changes in the method of calculating the Reference Price or other prices for the Underlying that are relevant in accordance with these Terms and Conditions, including a change in the Trading Days or Trading Hours relevant for the Underlying, shall entitle the Issuer to adjust the Option Right accordingly in its reasonable discretion. The same applies in the case of securities representing shares as the Underlying in particular in the case of the amendment or addition of the terms of the securities representing shares by its issuer. The Issuer shall determine the date on which the adjusted Option Right shall first apply, taking account of the date of the change.
- (4) In the event that the Underlying is permanently delisted on the Relevant Exchange but continues to be listed on another exchange or another market which the Issuer in its reasonable discretion considers to be suitable (the "**New Relevant Exchange**"), then, subject to extraordinary termination of the Warrants by the Issuer pursuant to No. 2 of the General Conditions, the Cash Amount shall be calculated on the basis of the corresponding prices for the Underlying calculated and published on the New Relevant Exchange. In addition, all references in these Terms and Conditions to the Relevant Exchange shall then be deemed, insofar as the context allows, to be references to the New Relevant Exchange.
- (5) In the event that a voluntary or compulsory liquidation, bankruptcy, insolvency, winding up, dissolution or comparable procedure affecting the Company is initiated, or in the event of a process as a result of which all of the shares in the Company or all or substantially all of the

assets of the Company are nationalized or expropriated or required to be transferred in some other way to government bodies, authorities or institutions, or if following the occurrence of an event of another kind the Issuer reaches the conclusion that it is not possible to make an Adjustment that would reflect the changes that have occurred appropriately from a financial point of view, then the Issuer will terminate the Warrants pursuant to No. 2 of the General Conditions. The same applies in the case of securities representing shares as the Underlying in particular in the case of insolvency of the custodian bank of the securities representing shares or at the end of the term of the securities representing shares due to a termination by the issuer of the securities representing shares.

- (6) The rules described in the preceding paragraphs shall apply analogously to securities representing shares as the Underlying (such as ADRs, ADSs or GDRs).
- (7) The Issuer shall give notice of the Adjustments and the date on which the Adjustments become effective in accordance with No. 4 of the General Conditions.

No. 7

Market Disruption Events

- (1) If a Market Disruption Event in accordance with paragraph (2) of this No. 7 exists on the Valuation Date, then the Valuation Date shall be postponed to the next following day which fulfills the criteria for a Valuation Date in accordance with No. 2 (3) of the Issue Specific Conditions and on which a Market Disruption Event no longer exists. The Issuer shall endeavor to give notice to the Warrant Holders without delay in accordance with No. 4 of the General Conditions that a Market Disruption Event has occurred. However, there shall be no obligation to give notice. If, as a result of the provisions of this paragraph, the Valuation Date has been postponed for five (5) consecutive days that fulfill the criteria for a Valuation Date in accordance with No. 2 (3) of the Issue Specific Conditions and if the Market Disruption Event continues to exist on that day as well, then that day shall be deemed to be the Valuation Date and the Issuer shall determine the Cash Amount in its reasonable discretion taking account of the market conditions prevailing on any such deemed Valuation Date.

- (2) "**Market Disruption Event**" shall mean

- (i) the suspension or restriction of trading in the Underlying on the Relevant Exchange, or
- (ii) the suspension or restriction of trading (including the lending market) in a futures or options contract relating to the Underlying on a Futures Exchange on which futures or options contracts relating to the Underlying are traded (the "**Futures Exchange**");

if that suspension or restriction occurs or exists in the last half-hour before the calculation of the closing price of the Underlying that would normally take place and is material as determined by the Issuer in its reasonable discretion. A change in the Trading Days or Trading Hours on or during which the Underlying is traded does not constitute a Market Disruption Event, provided that the change takes place as the result of a previously announced change in the trading regulations by the Relevant Exchange.

Offer method

The Warrants are being offered over-the-counter on a continuous basis in one series.

The offer of the Warrants in France begins on 17 February 2022.

The offer of the Warrants ends with expiration of the validity of the Base Prospectus on 17 December 2022, subject to an extension beyond this date by publication of a base prospectus which succeeds the Base Prospectus dated 16 December 2021. Furthermore, the Issuer may terminate the offer of the Warrants early by notice on the Issuer's website www.citifirst.com.

Listing and trading

Application has been made to include the Warrants to trading on Euronext Access, by Euronext Paris S.A., which is not a regulated market within the meaning of Directive 2004/39/EC starting from 17 February 2022.

It cannot be guaranteed that the listing will be permanently maintained even after the Warrants are listed. Such an amendment would be published on the website of the Issuer.

An early termination of the offer shall, where appropriate, be effected by notice on the Issuer's website.

Issue price, price calculation and costs and taxes on purchase

The initial issue price is specified in Table 1 of the Annex to the Issue Specific Conditions.

No costs or taxes of any kind for the Security Holders will be deducted by the Issuer whether the Warrants are purchased off-market (in countries where this is permitted by law) or via a stock exchange. Such costs or taxes should be distinguished from the fees and costs charged to the purchaser of the Warrants by his bank for executing the securities order, which are generally shown separately on the statement for the purchase transaction in addition to the price of the Warrants. The latter costs depend solely on the particular terms of business of the Warrant purchaser's bank. In the case of a purchase via a stock exchange, additional fees and expenses are

also incurred. Furthermore, Security Holders are generally charged an individual fee in each case by their bank for managing the securities account. Notwithstanding the foregoing, profits arising from the Warrants or capital represented by the Warrants may be subject to taxation.

The initial issue price includes EUR 0.03 costs incurred by the Issuer.

What are the key risks that are specific to the Issuer?

Insolvency and solvency risk

The insolvency and solvency risk arises from, among other things, the risk that the Issuer will not be able to efficiently meet both expected and unexpected current and future cash flow and collateral requirements, as well as the risk that the company is unable to obtain sufficient liquidity. The insolvency and solvency risk may also materialize if third parties which owe the Issuer money, securities or other assets will not perform their obligations. In addition, risk of losses may arise as a result of changes in foreign exchange rates, interest rates, equity and commodities prices as well as price fluctuations of goods and derivatives. In particular, the aforementioned risks may result in the Issuer being unable to meet its obligations arising from the securities, or being unable able to meet them in a timely manner or in full. If insolvency proceedings are opened against the Issuer, investors may even suffer a **total loss**.

Trading risks related to derivative securities issued by the Issuer

Based on risk models used by the Issuer, the Issuer enters into hedging transactions to hedge open positions from issued securities. Particularly noteworthy in this context are risk positions arising from changes in the volatility of the underlying and so-called "gap risks" as a result of unexpected jumps in the price of the underlying. At best, the Issuer can to a large extent close out such risk positions, but it will be unable to close them out completely or enter into matching positions for all open positions. If a counterparty of the Issuer defaults, then there is a risk that hedging transactions cannot be closed or have to be closed and need to be unwinded afterwards because of the counterparty's default. The risks arising in connection with trading in derivative securities issued by the Issuer may have a material adverse effect on the Issuer's liquidity and financial position. This may have a significant impact on the value of the securities issued by the Issuer and may lead to a **total loss**.

Rights attached to the Securities

Mini Future Short (*Turbo Infini Put*) Warrants with knock-out enable investors to positively participate on a disproportionate (leveraged) basis in the negative performance of the underlying.

In return, however, they also adversely participate on a leveraged basis in any positive performance of the underlying and in addition bear the risk that the Mini Future Short (*Turbo Infini Put*) Warrant with knock-out may expire worthless or almost worthless immediately (knock-out event) if the observation price of the underlying reaches or exceeds the knock-out barrier at any time during the observation period within the observation hours.

In the event of exercise by the investor or following termination by the Issuer, in each case on a valuation date, the cash or termination amount received by the investors on the maturity date is the difference, multiplied by the multiplier, by which the reference price of the underlying determined on the valuation date is lower than the respective strike, converted into the settlement currency.

If the observation price of the underlying reaches or exceeds the knock-out barrier at any time during the observation period within the observation hours (knock-out time), the investor receives the stop-loss cash amount which is equal to the difference, multiplied by the multiplier, by which the hedge price is lower than the strike, provided that this amount is positive, converted into the settlement currency. The hedge price is a price determined by the Issuer in its reasonable discretion within 120 minutes following the occurrence of the knock-out time as the level of the underlying in line with the market, calculated taking into account the calculated proceeds from unwinding the corresponding hedging transactions. For this purpose, the hedge price is at least equal to the highest price of the underlying determined within 120 minutes following the occurrence of the knock-out time. If the stop-loss cash amount is zero or negative, the Mini Future Short (*Turbo Infini Put*) Warrant expires worthless.

Ranking of the Securities

The Securities create direct, unsecured and unsubordinated obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory provisions.

Restrictions on the free transferability of the Securities

The Securities are transferable, subject to selling restrictions, in accordance with the laws applying in each case and, where relevant, the respective applicable regulations and procedures of the depository agent in whose records the transfer is registered.

Where will the Securities be traded?

Application has been made to include the Securities to trading on Euronext Access, by Euronext Paris S.A., which is not a regulated market within the meaning of Directive 2004/39/EC starting from 17/02/2022.

What are the key risks that are specific to the Securities?

Risks associated with the purchase of Mini Future Short (*Turbo Infini Put*) Warrants

If exercised by the investor or terminated by the Issuer, investors receive on the maturity date as cash or termination amount the difference, multiplied by the multiplier, by which the reference price of the underlying determined on the valuation date is lower than the respective strike. If the reference price is equal to or higher than the strike, the Mini Future Short (*Turbo Infini Put*) Warrant expires worthless.

The term of the Warrants ends prematurely at the knock-out time if a knock-out event occurs. A knock-out event occurs if the relevant price of the underlying is equal to or rises above the knock-out barrier during the relevant barrier observation time.

There is a risk that the unwinding of the Issuer's hedging positions could have a negative impact on the price of the underlying, thereby triggering a knock-out event.

The strike of the Warrants is subject to ongoing adjustment. As a result of such daily adjustment of the strike, the risk of a knock-out event occurring can increase.

In addition, the relevant knock-out barrier is adjusted by the Issuer in its reasonable discretion either for the respective following financing level adjustment period on an adjustment date or on any other day as specified in the relevant the Terms and Conditions. Investors should be aware that a knock-out event can also occur solely as a result of an adjustment of the knock-out barrier.

The stop-loss cash amount payable in the event of a knock-out is equal to the difference, multiplied by the multiplier, and converted where applicable into the settlement currency, between the strike of the Warrant and the hedge price of the underlying calculated by the Issuer. The hedge price of the underlying is a price determined by the Issuer in its reasonable discretion. Since this hedge price of the underlying calculated by the Issuer may also be considerably higher than the knock-out barrier, the Security Holder bears this so called gap risk.

Upon occurrence of a knock-out event, the stop-loss cash amount may also be zero if the hedge price calculated by the Issuer is at or above the strike at the relevant time after occurrence of a knock-out event. In addition, the Security Holder bears the risk that the reference price of the underlying on the relevant valuation date is at or above the strike of the Warrant. In both cases, the Warrant expires worthless and the Security Holder suffers a **total loss**.

Specific price risk in connection with jumps in the price of the underlying

The risk of jumps in the price of the underlying, for example between the close of trading on the previous day and the start of trading on the following trading day, is known as gap risk. The gap risk is essentially accounted for by the distance between the strike and the knock-out barrier. However, if the gap risk materializes and a knock-out event is triggered as a result, the resulting loss is borne by the Security Holder. Therefore, the Security Holders bear the gap risk directly.

Risk in connection with tradability

The risk exists that a knock-out event may also occur at times when the Warrants are not normally traded.

Investors' risk of loss also depends on the performance of the currency of the underlying

The risk of loss should the Warrants be exercised or expire or should the Warrants be sold during their term thus not only depends on the performance of the price of the underlying, but also to a large extent on the developments in the relevant currency markets. Negative developments in the relevant currency markets, i.e. an increase in the value of the settlement currency compared to the currency in which the underlying is expressed (reference currency), increase the risk of loss by reducing the value of the Warrants during their term or the level of any cash amount to be received upon exercise or expiration accordingly.

Risk due to extraordinary termination of the Securities

In the case of an extraordinary termination by the Issuer, the Security Holders are not entitled to payment of any amount to be calculated in accordance with the Terms and Conditions for the scheduled maturity on the basis of a redemption formula. In this case, the Issuer will determine the termination amount, if any, to be paid to the Security Holders at its reasonable discretion.

Risk of restrictions of the ability to sell the Securities due to market disruption events

Market disruption events may temporarily or permanently restrict the ability to sell the Securities, increase the cost of selling or introduce an additional price risk.

Market price risk

In particular, the following circumstances may affect the market price of the Securities. Individual market factors may also occur simultaneously and may be mutually reinforcing: changes in the value of the underlying (including changes in the implied volatility of the underlying), changes in the creditworthiness or credit assessment of the Issuer, or changes in the market interest rate.

Liquidity Risks

Security Holders bear the risk that there is no liquid market for trading the Securities on a stock exchange. This means that they cannot sell the Securities at a time desired by them.

The secondary market for the Securities may be limited or the Securities may have no liquidity which may adversely impact the value of the Securities or the ability of the investor to dispose of them.

Risks in connection with shares as the underlying

The development of the share price cannot be predicted and is determined by macroeconomic factors, e.g. the interest rate and price level on capital markets, currency developments, political circumstances, as well as company-specific factors. Significant corporate policy decisions may also have a significant negative impact on the share price. In particular, the issuer of a share could get into payment difficulties and insolvency or comparable proceedings could be opened against its assets. Shares of companies with a low to medium market capitalisation may be subject to higher risks than shares of larger companies. Additional risks exist in the case of shares in companies with a registered office or business activity in countries with little legal certainty.

SECTION D – KEY INFORMATION ON THE OFFER OF SECURITIES TO THE PUBLIC AND/OR THE ADMISSION TO TRADING ON A REGULATED MARKET

Under which conditions and timetable can I invest in this Security?

The Securities are being offered over-the-counter on a continuous basis in one series.

The offer of the Securities in France begins on 17/02/2022.

The Securities may be offered or sold only if all applicable securities laws and regulations in force in the jurisdiction in which a purchase, offer, sale or delivery of Securities is made or in which this document is circulated or kept for inspection have been complied with, and if all consents or authorizations required for the purchase, offer, sale or delivery of the Securities in accordance with the legal norms in force in that jurisdiction have been obtained.

In particular, the Securities may not be purchased or held by or transferred to a Benefit Plan Investor or plan subject to Similar Law unless its purchase or holding of the Securities will not (i), in the case of a Benefit Plan Investor, give rise to a nonexempt prohibited transaction under Section 406 of the U.S. Employee Retirement Income Security Act of 1974, as amended ("ERISA") or Section 4975 of the U.S. Internal Revenue Code of 1986, as amended (the "Code") because such acquisition and holding satisfies the conditions for relief under an applicable prohibited transaction exemption or (ii), in the case of a plan

subject to Similar Law, result in a violation of Similar Law. For the purposes hereof, "**Benefit Plan Investor**" shall mean (a) an employee benefit plan (as defined in Section 3(3) of ERISA), subject to Title I of ERISA, (b) a plan described in and subject to Section 4975 of the Code, (c) any entity deemed to hold plan assets of such employee benefit plan or plan and "**Similar Law**" shall mean a law that is similar to the fiduciary responsibility or prohibited transaction provisions of ERISA or Section 4975 of the Code or (d) an employee benefit plan or plan subject to Similar Law. The Securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the "**Securities Act**") or with any securities regulatory authority of any state or other jurisdiction of the United States, the Issuer has not been registered and will not be registered as an "investment company" under the U.S. Investment Company Act of 1940, as amended, in reliance on Section 3(c)(7) thereof and no person has registered nor will register as a commodity pool operator of the Issuer under the U.S. Commodity Exchange Act, as amended (the "**CEA**") and the rules of the U.S. Commodity Futures Trading Commission thereunder (the "**CFTC Rules**"). Accordingly, the Securities may not be offered, sold, pledged, resold, delivered or otherwise transferred at any time except (a) in an "offshore transaction" (as such term is defined under Regulation S under the Securities Act ("**Regulation S**")) and (b) to persons that are both (1) "Non-United States persons" (as such term is defined under CFTC Rule 4.7(a)(1)(iv), under the Commission regulation 23.160 and the CFTC's Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations, 78 Fed. Reg. 45292 (26 July 2013), and (2) not "U.S. Persons" (as such terms is defined under rule 902(k)(1) of Regulation S (any such person both (1) and (2) immediately above, a "**Permitted Purchaser**")). If a Permitted Purchaser acquiring the Securities is doing so for the account or benefit of another person, such other person must also be a Permitted Purchaser. The Securities do not constitute, and have not been marketed as, contracts of sale of a commodity for future delivery (or options thereon) subject to the CEA, and trading in the Securities has not been approved by the U.S. Commodity Futures Trading Commission under the CEA.

The initial issue price is EUR 3.32. This includes EUR 0.03 costs incurred by the Issuer. The purchase of the Securities entails no further costs or taxes that are incurred by the Issuer specifically for purchasers or subscribers. If the investor purchases the Securities from a distributor, the purchase price to be paid by the investor may include sales commissions that have to be disclosed by the distributor.

Why is this prospectus being produced?

Use of the proceeds

The use of the proceeds serves solely the purpose of making profits and/or hedging certain risks of the Issuer. The net proceeds from the issuance of Securities will be used by the Issuer for its general business purposes.

Underwriting

The offer is not subject to a takeover agreement with a fixed takeover obligation.

Most material conflicts of interest pertaining to the offer or the admission to trading

The Issuer belonging to the Citigroup Inc. Group (Citigroup Inc. together with its subsidiaries the "**Citigroup Group**" or the "**Citigroup**") and the companies of the Citigroup Group operate daily on the international and German securities, foreign exchange, credit derivatives and commodity markets. They may therefore enter into transactions or business relations that may impact the price of the underlying or the constituents of the underlying and thus also the price of the Securities.

The Issuer and companies of the Citigroup Group may receive non-public information relating to the underlying or the constituents of the underlying, but are under no obligation to pass on such information to the security holders.

Within the context of market making, the Issuer as market maker determines the price of the Securities to a decisive extent. The prices set by the market maker will not always correspond to the prices that would have been formed in liquid stock exchange trading. This activity can lead to conflicts of interest since the responsibilities of the calculation agent include making certain determinations and decisions which could have a negative effect on the price of the Securities or the level of the cash amount.

Quels sont les principaux risques propres à l'Émetteur ?

Insolvabilité et risque d'insolvabilité

L'insolvabilité et le risque d'insolvabilité procèdent, entre autres, de l'incapacité éventuelle de l'Émetteur à couvrir ses besoins actuels et futurs, prévus et imprévus, en matière de trésorerie et de collatéral, et de son incapacité à obtenir des liquidités en quantité suffisante. L'insolvabilité et risque d'insolvabilité peuvent se matérialiser si des tiers qui doivent à l'Émetteur des sommes d'argent, des titres ou d'autres actifs sont défaillants dans l'accomplissement de leurs obligations. En outre, les variations des taux de change, de taux d'intérêt, de cours des valeurs mobilières et des et des matières premières négociables ainsi que des fluctuations de prix des biens et des dérivés peuvent entraîner des pertes. En particulier, en raison des risques susmentionnés, l'Émetteur peut se retrouver dans l'incapacité d'honorer ses obligations résultant des titres ou dans l'incapacité de les honorer pleinement ou à l'échéance. Si une procédure d'insolvabilité est ouverte à l'encontre de l'Émetteur, les investisseurs pourraient subir une **perte totale**.

Risques de négociation associés aux titres produits dérivés émis par l'Émetteur

L'Émetteur utilise des modèles de risque pour conclure des opérations de couverture qui lui servent à couvrir des positions ouvertes sur des titres émis. Dans ce contexte, il convient de mentionner les positions à risque résultant des mouvements de volatilité du sous-jacent ou les risques de décalage ou « *gap risk* » résultant des hausses soudaines du prix du sous-jacent. Au mieux, l'Émetteur peut dénouer de telles positions à risque dans une large mesure, mais il lui sera impossible de les dénouer

totalemment ou de conclure des positions inverses pour toutes les positions ouvertes. Dans le cas où une contrepartie de l'Émetteur fait défaut, il existe un risque que des opérations de couverture ne puissent être conclues ou doivent être conclues et aient besoin d'être dénouées ultérieurement en raison du défaut de contrepartie. Les risques liés à la négociation d'instruments dérivés émis par l'Émetteur peuvent entraîner un changement défavorable significatif sur sa liquidité et sa situation financière, ce qui peut avoir un impact important sur la valeur des titres émis par l'Émetteur et entraîner une **perte totale**.

Droits attachés aux Titres

Les Warrants Mini Future Short (*Turbo Infini Put*) à barrière de désactivante permettent aux investisseurs de participer de façon positive avec un effet de levier à la performance négative de la valeur sous-jacente.

En contrepartie, cependant, ils participent également de manière défavorable sur une base à effet multiplicateur à toute performance positive de la valeur sous-jacente en prenant en plus le risque que le Warrant Mini Future Short (*Turbo Infini Put*) à barrière désactivante perde sa valeur ou quasiment sa valeur immédiatement (événement désactivant) si le prix observé de la valeur sous-jacente atteint ou dépasse la barrière désactivante à tout moment pendant la période d'observation au cours des heures d'observation au cours des heures d'observation.

Lorsque l'investisseur fait jouer son droit d'exercice ou après clôture par l'Émetteur, dans les deux cas à une date d'évaluation, le montant en numéraire ou le montant de clôture reçu par les investisseurs à la date d'échéance est égal au déficit, multiplié par le coefficient multiplicateur, entre le prix de référence de la valeur sous-jacente à la date d'évaluation et le prix d'exercice correspondant converti dans la devise de règlement.

Si le prix d'observation de la valeur sous-jacente atteint ou dépasse la barrière désactivante à tout moment pendant la période d'observation au cours des heures d'observation (moment de désactivation), l'investisseur reçoit le montant stop-loss qui équivaut à la différence, multipliée par le coefficient multiplicateur, entre le prix de couverture et le prix d'exercice sous réserve que ce montant soit positif converti dans la devise de règlement. Le prix de couverture est un prix déterminé par l'Émetteur à sa discrétion dans des limites raisonnables dans les 120 minutes suivant la survenue de l'événement désactivant

comme représentant le niveau de la valeur sous-jacente alignée sur le marché, calculée en tenant compte des bénéfices calculés du déboucllement des transactions de couverture correspondantes. À cette fin, le prix de couverture est au minimum égal au prix le plus élevé de la valeur sous-jacente déterminé dans les 120 minutes suivant la survenue de l'événement désactivant. Si le montant stop-loss est nul ou négatif, le Warrant Mini Future Short (*Turbo Infini Put*) à barrière désactivante expire sans valeur.

Rang des Titres

Les Titres créent des obligations directes non garanties et non subordonnées de l'Émetteur qui se classent pari passu les unes par rapport aux autres et par rapport à toutes autres obligations actuelles et futures non garanties et non subordonnées de l'Émetteur, à l'exception des obligations qui ont priorité en raison de dispositions statutaires obligatoires.

Restrictions à la libre négociabilité des Titres

Sous réserve des restrictions de vente applicables, les Titres sont cessibles selon les lois s'appliquant à chaque cas et, le cas échéant, les réglementations et les procédures respectives applicables de l'agent dépositaire dans les livres duquel le transfert est enregistré.

Sur quel(s) marché(s) les Titres seront-ils cotés ?

Une demande a été déposée pour admettre les Titres à la négociation sur le Euronext Access, par Euronext Paris S.A., qui n'est pas un marché réglementé au sens de la Directive 2004/39/CE à compter du 17/02/2022.

Quels sont les principaux risques propres aux Titres ?

Risques liés à l'achat de Warrants Mini Future Short (*Turbo Infini Put*)

Dans le cas d'un exercice de son droit par l'investisseur ou d'un exercice par l'Émetteur de son droit de résiliation, le montant en numéraire ou le montant de résiliation perçu par l'investisseur à la date d'échéance est égal à la différence, multipliée par le coefficient multiplicateur, par laquelle le prix de référence du sous-jacent calculé à la date d'évaluation est inférieure au prix d'exercice correspondant. Si le prix de référence est égal ou supérieur au prix d'exercice, le Warrant Mini Future Short (*Turbo Infini Put*) expire sans valeur.

Les Warrants expirent prématurément à la date de knock-out en cas d'un cas de knock-out. Un cas de knock-out survient si le prix du sous-jacent concerné est égal ou supérieur à la barrière désactivante durant la période d'observation de la barrière concernée.

Il y a un risque que le déboucllement des positions de couverture de l'Émetteur puisse avoir un impact négatif sur le prix du sous-jacent et ainsi provoquer un cas de knock-out.

Le prix d'exercice des Warrants est régulièrement ajusté. Du fait de l'ajustement quotidien du prix d'exercice, le risque qu'un cas de knock-out se produise peut augmenter.

En outre, la barrière désactivante concernée est ajustée par l'Émetteur à son appréciation discrétionnaire raisonnable, soit pour la période suivante d'ajustement du niveau de financement à une date d'ajustement, soit tout autre jour tel que défini dans les Conditions Générales. Les investisseurs doivent être conscients qu'un cas de knock-out peut également se produire comme seul résultat d'un ajustement de la barrière désactivante.

Le montant stop-loss en numéraire payable lors de la survenance de l'un des cas de knock-out correspond à la différence, multipliée par le coefficient multiplicateur, et convertie si nécessaire dans la devise de règlement, entre le prix d'exercice du Warrant et le prix de couverture du sous-jacent calculé par l'Émetteur. Le prix de couverture du sous-jacent est fixé par l'Émetteur à son appréciation raisonnable. Dans la mesure où le prix de couverture du sous-jacent calculé par l'Émetteur peut être considérablement supérieur à la barrière désactivante, le Détenteur de Titres supporte également ce risque de gap.

À la survenance de l'un des cas de knock-out, le montant stop-loss en numéraire peut être nul si le prix de couverture calculé par l'Émetteur est égal ou supérieur au prix d'exercice à l'heure appropriée après la survenance de l'un des cas de knock-out. De plus, le Détenteur de Titres court le risque que le prix de référence du sous-jacent à la date d'évaluation appropriée soit égal ou supérieur au prix d'exercice du Warrant. Dans les deux cas, le Warrant expire sans valeur et le Détenteur de Titres subit une **perte totale**.

Risque de prix spécifique lié aux fortes hausses du prix du sous-jacent

Le risque de fortes hausses du prix du sous-jacent, par exemple entre l'heure de clôture des négociations la veille et l'heure d'ouverture des cours le lendemain, est dénommé risque de décalage (ou « gap risk »). Le risque de décalage correspond essentiellement à l'écart entre le prix d'exercice et la barrière désactivante. Toutefois, si le risque de décalage se matérialise et qu'un cas de knock-out survient en conséquence, la perte qui en résulte est supportée par le Détenteur de Titres. Par conséquent, les Détenteurs de Titres supportent le risque de décalage directement.

Risque concernant la négociabilité

Le risque existe qu'un événement de knock-out puisse également se produire en dehors des heures où les Warrants sont habituellement négociés. Warrants sont habituellement négociés.

Le risque de perte auquel s'exposent les investisseurs dépend également de la performance de la devise du sous-jacent

Le risque de perte dans le cas où les Warrants seraient exercés, expireraient ou seraient vendus avant leur arrivée à échéance, ne dépendrait pas seulement de la performance du prix du sous-jacent, mais également, et dans une large mesure, de l'évolution des marchés des changes appropriés. Une évolution négative des marchés des changes appropriés, c'est-à-dire une hausse de la valeur de la devise de règlement par rapport à la devise de libellé du sous-jacent (devise de référence), augmenterait le risque de perte en ce que cela réduirait la valeur des Warrants pendant leur période de validité ou le montant en numéraire à percevoir lors de l'exercice ou consécutivement à l'expiration des Warrants.

Risques liés à la résiliation extraordinaire des Titres

En cas de résiliation extraordinaire par l'Émetteur, les Détenteurs des Titres ne peuvent prétendre au versement du montant calculé conformément aux Conditions Générales pour l'échéance prévue sur la base d'une formule de rachat. Dans ce cas, l'Émetteur fixera à son appréciation raisonnable le montant de résiliation éventuel à verser aux Détenteurs de Titres.

Risques de restrictions sur la capacité à vendre les Titres en raison d'événements perturbant le bon fonctionnement des marchés

Des événements perturbant le bon fonctionnement des marchés peuvent restreindre de manière temporaire ou permanente la capacité à vendre les Titres, accroître le coût de leur vente ou créer un risque de prix supplémentaire.

Risques liés à la valeur de marché des Titres

En particulier, les circonstances suivantes peuvent affecter le prix de marché des Titres. Des facteurs de marché individuels peuvent survenir simultanément et se renforcer mutuellement : évolution de la valeur du sous-jacent (y compris les variations de la volatilité implicite du sous-jacent), évolution de la solvabilité ou de la note de crédit de l'Émetteur, ou variations des taux d'intérêt du marché.

Risques de liquidité

Les Détenteurs de Titres sont exposés au risque qu'il n'y ait pas de marché liquide pour négocier les Titres sur une bourse de valeurs mobilières. Cela signifie qu'ils ne peuvent pas vendre les Titres au moment qu'ils souhaitent.

La taille du marché secondaire pour les Titres peut être limitée ou les Titres peuvent se révéler illiquides, ce qui peut impacter négativement la valeur des Titres ou la capacité de l'investisseur à les céder.

Risques liés aux actions en tant que sous-jacent

L'évolution du prix de l'action ne peut pas être prédite et est déterminée par des facteurs macro-économiques, par exemple le taux d'intérêt et le niveau des prix sur les marchés de capitaux, les évolutions du taux de change, les circonstances politiques, ainsi que les facteurs spécifiques à l'entreprise. Les décisions politiques importantes d'une entreprise peuvent également avoir un impact négatif important sur le prix des actions. L'émetteur d'une action en particulier, pourrait avoir des difficultés de paiement et être en faillite ou des procédures comparables pourraient être ouvertes contre ses actifs. Les actions des entreprises avec une capitalisation de marché faible à moyenne peuvent être sujettes à des risques plus élevés que les actions d'entreprises plus importantes. Il existe des risques additionnels dans le cas d'actions d'entreprises ayant un bureau ou une activité commerciale enregistrés dans des pays à faible sécurité juridique.

Pourquoi publions-nous ce Prospectus ?

Utilisation du produit de la vente

Le produit de la vente sert exclusivement à réaliser des profits et/ou à couvrir certains risques de l'Émetteur. L'Émetteur utilisera le produit net issu de l'émission des Titres pour financer ses activités.

Principaux conflits d'intérêts relatifs à l'offre ou à l'admission à la négociation

L'Émetteur, qui appartient au groupe Citigroup Inc. (Citigroup Inc. et ses filiales étant conjointement dénommées le « **Groupe Citigroup** » ou « **Citigroup** »), et les sociétés du Groupe Citigroup opèrent quotidiennement sur les marchés allemands et internationaux des valeurs mobilières, des changes, des dérivés de crédit et des matières premières. Ils peuvent donc conclure des transactions ou nouer des relations commerciales qui peuvent avoir un impact sur le prix du sous-jacent ou sur les éléments constitutifs du sous-jacent et, partant, sur le prix des Titres.

L'Émetteur et les sociétés du groupe Citigroup peuvent recevoir des informations de nature non publique se rapportant au sous-jacent ou à des éléments constitutifs du sous-jacent, mais ne sont pas tenus de les communiquer aux détenteurs de titres.

Dans le contexte de la tenue du marché, l'Émetteur, en tant que teneur de marché, fixe le prix des Titres de manière décisive. Les prix fixés par le teneur de marché ne correspondront pas toujours aux prix qui se seraient formés sur des bourses de valeurs mobilières liquides. Cette activité peut entraîner des conflits d'intérêt dans la mesure où les responsabilités de l'agent de calcul comprennent certaines décisions qui pourraient avoir un effet négatif sur le prix des Titres ou le niveau du montant en numéraire.
