No. 2a

Knock-Out

- (1) If the Observation Price of the Underlying (No. 5 (2) of the Issue Specific Conditions) expressed in the Reference Currency is equal to or falls below (Mini Long) or is equal to or exceeds (Mini Short) the Knock-Out Barrier (No. 2b (2) of the Issue Specific Conditions) of the Warrant (the **"Knock-Out Event"**) during the Observation Period (No. 2 (3) of the Issue Specific Conditions) during the Observation Hours (No. 5 (2) of the Issue Specific Conditions) at any time (referred to in the following as the **"Knock-Out Time"**), the term of the Warrants shall end early at the Knock-Out Time. If the Stop-Loss Cash Amount in accordance with paragraph (2) of this No. 2a is positive, the Warrant Holder shall receive the Stop-Loss Cash Amount. The Issuer will give notice without delay in accordance with No. 4 of the General Conditions that the Observation Price of the Underlying has reached or fallen below (Mini Long) or reached or exceeded (Mini Short) the Knock-Out Barrier.
- (2) If the term of the Warrants ends early as a result of a Knock-Out Event, the Issuer shall pay any Stop-Loss Cash Amount to the Warrant Holders.

The **"Stop-Loss Cash Amount"** shall be either the Stop-Loss Intrinsic Value, if the latter is already expressed in the Settlement Currency, or the Stop-Loss Intrinsic Value converted into the Settlement Currency using the Stop-Loss Exchange Rate.

The **"Stop-Loss Intrinsic Value"** shall be the difference, expressed in the Reference Currency and multiplied by the Multiplier, by which the Hedge Price is higher than (Mini Long) or lower than (Mini Short) the Strike.

The **"Hedge Price"** shall be a price determined by the Issuer in its reasonable discretion within 120 minutes following the occurrence of the Knock-Out Time as the level of the Underlying in line with the market, calculated taking into account the calculated proceeds from unwinding the corresponding hedging transactions. For this purpose, the Hedge Price

shall be at least equal to the lowest (Mini Long) or highest (Mini Short) price of the Underlying determined within 120 minutes following the occurrence of the Knock-Out Time.

The "**Stop-Loss Exchange Rate**" shall be the exchange rate determined by the Issuer in its reasonable discretion within a maximum of 120 minutes following the occurrence of the Knock-Out Time in place of the Reference Rate for Currency Conversion.

In the event that the Knock-Out Time occurs less than 120 minutes before the end of the normal trading hours of the Underlying, the time available in accordance with the preceding paragraph for the determination of the Hedge Price shall be extended accordingly from the start of the next following exchange session.

If Market Disruption Events within the meaning of No. 7 of the Issue Specific Conditions occur during the time available to the Issuer for the determination of the Hedge Price and if the Issuer has not yet determined the Hedge Price when the Market Disruption Events occur, the time available for the determination of the Hedge Price shall be extended for the duration of the Market Disruption Events. The right of the Issuer to determine the Hedge Price or the Stop-Loss Exchange Rate shall continue to apply during the existence of Market Disruption Events.

If the Market Disruption Events within the meaning of No. 7 of the Issue Specific Conditions continue to exist until the end of the fifth Banking Day in Frankfurt am Main, at the Auxiliary Location and at the location of the Relevant Exchange following the next Exercise Date for the Warrants and if the Issuer has not yet determined the Hedge Price, the Issuer shall determine the Hedge Price in its reasonable discretion taking into account the market conditions prevailing on that day.

The payment of any Stop-Loss Cash Amount shall be made in accordance with No. 3 (4) of the Issue Specific Conditions, with the proviso that the Stop-Loss Payment Date shall be no later than the fifth Banking Day in Frankfurt am Main and at the location of the Depository Agent following the determination of the Hedge Price.

No. 2b

Adjustment Amount

- (1) The respective "**Strike**" of a series shall be equal on the Issue Date to the value specified in Table 1 of the Annex to the Issue Specific Conditions. Subsequently, the Strike shall be adjusted on each calendar day during a Financing Level Adjustment Period by the Adjustment Amount calculated by the Issuer for that relevant calendar day. The Adjustment Amount for the Warrants may vary. The "**Adjustment Amount**" of a series applying for each calendar day during the respective Financing Level Adjustment Period shall be equal to the result obtained by multiplying the Strike applying on the Adjustment Date falling in that Financing Level Adjustment Period by the Adjustment Rate applicable in that Financing Level Adjustment Period and converted to the amount for one calendar day using the actual/360 day count convention. The resulting Strike for each calendar day shall be rounded to at least four decimal places in accordance with standard commercial practice, but the calculation of the next following Strike in each case shall be based on the unrounded Strike for the preceding day. The calculations for the first Financing Level Adjustment Period shall

be based on the Strike on the Issue Date. The relevant Strike for each calendar day shall be published on the Issuer's Website.

- (2) The respective "**Knock-Out Barrier**" of a series for the first Financing Level Adjustment Period shall be equal to the value specified in Table 1 of the Annex to the Issue Specific Conditions. For each subsequent Financing Level Adjustment Period, the Knock-Out Barrier shall be determined by the Issuer in its reasonable discretion on the Adjustment Date falling in that Financing Level Adjustment Period, taking into account the market conditions prevailing in each case (in particular taking into account volatility).

In addition, the Issuer shall have the right, on days on which, in the determination of the Issuer, the Strike after Adjustment (in accordance with paragraph (1) of this No. 2b) would be equal to, fall below or exceed the Knock-Out Barrier respectively, to adjust the Knock-Out Barrier in its reasonable discretion at the same time as the Adjustment of the Strike, taking into account the market conditions prevailing in each case (in particular taking into account volatility).

The relevant Knock-Out Barrier for each calendar day shall be published on the Issuer's Website.

- (3) In the event of dividend payments or other cash distributions equivalent to dividend payments in respect of the Underlying (applicable in the case of shares as the Underlying) or in respect of the shares on which the Underlying is based (applicable in the case of stock indices as the Underlying), the Strike applying in each case and, where relevant, the Knock-Out Barrier shall be adjusted in accordance with No. 2 (3) of the Issue Specific Conditions (Adjustment due to Dividend Payments).

In the event of any Adjustment due to Dividend Payments in respect of a dividend on the shares of an entity formed or incorporated in the United States (a "**U.S. Dividend**"), the Issuer shall calculate an amount (the "**U.S. Dividend Withholding Amount**") that, together with the net dividend amount reflected in the adjustment, equals 100 per cent of the gross amount of such U.S. Dividend. At the time each such U.S. Dividend is paid, the U.S. Dividend Withholding Amount is deemed to be paid to the Warrant Holder in respect of the Warrants, whereas it shall actually be withheld by the Issuer and deposited with the United States Internal Revenue Service (the "**IRS**").

No. 3

In any other circumstances, the Issuer shall have the right to return to the Warrant Holder any performances already made by the Warrant Holder without interest at the Warrant Holder's risk and expense; in this event the Exercise Notice shall not become effective.
- (3) All taxes or other levies that may be incurred in connection with the exercise of the Warrants shall be borne and be paid by the Warrant Holders. The Issuer or the paying agent is entitled to withhold any taxes or other levies from the Cash Amount or other amounts payable to the holder that are to be paid by the Warrant Holder in accordance with the preceding sentence.

The exercise or settlement amount shall be paid in the Settlement Currency without a requirement for the Issuer or the Exercise Agent to give notice of any kind.

- (4) The Issuer will transfer any Cash Amount to the Depository Agent on the Payment Date upon Exercise for the credit of the Warrant Holders registered with the Depository Agent at the close of business on the preceding Banking Day at the location of the Depository Agent. Each termination notice issued pursuant to this No. 4 is irrevocable and must specify the Termination Date. The Termination shall become effective on the date specified in the announcement of the notice. - (2) In the event of Termination by the Issuer, No. 3 of the Issue Specific Conditions shall not apply. The Exercise Date within the meaning of No. 2 (3) of the Issue Specific Conditions shall in this case be the date on which the Termination becomes effective. The Payment Date shall be the Payment Date upon Termination in accordance with paragraph (3) of this No. 4.
- (3) In this event, the Issuer will transfer the Cash Amount for all of the Warrants affected by the Termination to the Depository Agent within five (5) Banking Days at the registered office of the Issuer and at the location of the Depository Agent after the Termination Date for the credit of the Warrant Holders registered with the Depository Agent on the second day following the Termination Date (referred to in the following as "**Payment Date upon Termination**"). Upon the transfer of the Cash Amount to the Depository Agent, the Issuer shall be released from its payment obligations to the extent of the amount paid.

The Depository Agent has given an undertaking to the Issuer to make a corresponding onward transfer.

In the event that the onward transfer is not possible within three months after the Payment Date upon Termination ("**Presentation Period**"), the Issuer shall be entitled to deposit the relevant amounts with the Frankfurt am Main Local Court for the Warrant Holders at their risk and expense with a waiver of its right to reclaim those amounts. - (2) Changes in the calculation of the Underlying (including corrections) or in the composition or weighting of the prices or securities on the basis of which the Underlying is calculated shall not result in an adjustment of the Option Right unless, in the reasonable discretion of the Issuer, as a result of a change (including a correction) the new relevant concept and the calculation of the Underlying are no longer comparable with the previous relevant concept or the previous calculation of the Underlying. This shall apply in particular if a change of whatever nature results in a material change in the value of the Index even though the prices of the individual securities included in the Underlying and their weighting remain the same. The Option Right may also be adjusted in the event that the Underlying is discontinued and/or replaced by another Index. The Issuer shall adjust the Option Right in its reasonable discretion based on the most recently calculated price with the objective of preserving the financial value of the Warrants, and shall determine the date on which the adjusted Option Right shall first apply, taking account of the date of the change. Notice shall be given of the adjusted Option Right and the date on which it first applies in accordance with No. 4 of the General Conditions.

The Issuer shall determine the date on which the adjusted Option Right shall first apply, taking account of the date of the change. Notice shall be given of the adjusted Option Right and the date on which it first applies in accordance with No. 4 of the General Conditions.
- (5) In the event that the Reference Price or other prices that are relevant for the Underlying in accordance with these Terms and Conditions are no longer calculated and published by the Relevant Index Calculator, but by another person, company or institution which the Issuer considers suitable in its reasonable discretion (the "**New Relevant Index Calculator**"), then the Cash Amount shall be calculated on the basis of the corresponding prices for the Underlying calculated and published by the New Relevant Index Calculator. In addition, all references in these Terms and Conditions to the Relevant Index Calculator shall then be deemed, insofar as the context allows, to be references to the New Relevant Index Calculator. The Issuer shall give notice of the Adjustments and the date on which the Adjustments become effective in accordance with No. 4 of the General Conditions.
- (6) If in the reasonable discretion of the Issuer it is not possible, for any reason whatsoever, to adjust the Option Right or to specify a Successor Index, then the Issuer or an expert appointed by the Issuer will be responsible for the continued calculation and publication of the Underlying on the basis of the existing index concept and the most recent value determined for the Index, subject to any Termination of the Warrants pursuant to No. 2 of the General Conditions. Notice shall be given of any continuation of this nature in accordance with No. 4 of the General Conditions.

No. 7

The Issuer shall endeavor to give notice to the Warrant Holders without delay in accordance with No. 4 of the General Conditions that a Market Disruption Event has occurred. However, there shall be no obligation to give notice. If, as a result of the provisions of this paragraph, the Valuation Date has been postponed for five (5) consecutive days that fulfill the criteria for a Valuation Date in accordance with No. 2 (3) of the Issue Specific Conditions and if the Market Disruption Event continues to

exist on that day as well, then that day shall be deemed to be the Valuation Date and the Issuer shall determine the Cash Amount in its reasonable discretion taking account of the market conditions prevailing on any such deemed Valuation Date.

(2) **"Market Disruption Event"** shall mean

- (i) the suspension or restriction of trading generally on the exchanges or markets on which the components of the Index are listed or traded; or

- (iii) the suspension or non-calculation of the Index as the result of a decision by the Relevant Index Calculator,

if that suspension, restriction or non-calculation occurs or exists in the last half-hour before the calculation of the closing price of the Index or of the assets underlying the Index that would normally take place and is material, in the reasonable discretion of the Issuer, for the fulfillment of the obligations arising from the Warrants. A change in the Trading Days or Trading Hours on or during which trading takes place or the Index is calculated does not constitute a Market Disruption Event, provided that the change takes place as the result of a previously announced change in the trading regulations by the exchange or in the rules for calculating the Index by the Relevant Index Calculator.

The Securities are being offered in a continuous over-the counter offering in one series.

Such an amendment would be published on the website of the Issuer.

No costs or taxes of any kind for the Security Holders will be deducted by the Issuer whether the Securities are purchased off-market (in countries where this is permitted by law) or via a stock exchange. Such costs or taxes should be distinguished from the fees and costs charged to the purchaser of the Securities by his bank for executing the securities order, which are generally shown separately on the statement for the purchase transaction in addition to the price of the Securities. The latter costs depend solely on the particular terms of business of the Securities purchaser's bank. In the case of a purchase via a stock exchange, additional fees and expenses are

also incurred. Furthermore, Security Holders are generally charged an individual fee in each case by their bank for managing the securities account. Notwithstanding the foregoing, profits arising from the Securities or capital represented by the Securities may be subject to taxation.

What are the key risks that are specific to the Issuer?

Insolvency and solvency risk

The insolvency and solvency risk arises from, among other things, the risk that the Issuer will not be able to efficiently meet both expected and unexpected current and future cash flow and collateral requirements, as well as the risk that the company is unable to obtain sufficient liquidity. The insolvency and solvency risk may also materialize if third parties which owe the Issuer money, securities or other assets will not perform their obligations. In addition, risk of losses may arise as a result of changes in foreign exchange rates, interest rates, equity and commodities prices as well as price fluctuations of goods and derivatives. In particular, the aforementioned risks may result in the Issuer being unable to meet its obligations arising from the securities, or being unable able to meet them in a timely manner or in full. If insolvency proceedings are opened against the Issuer, investors may even suffer a **total loss**.

Trading risks related to derivative securities issued by the Issuer

Based on risk models used by the Issuer, the Issuer enters into hedging transactions to hedge open positions from issued securities. Particularly noteworthy in this context are risk positions arising from changes in the volatility of the underlying and so-called "gap risks" as a result of unexpected jumps in the price of the underlying. At best, the Issuer can to a large extent close out such risk positions, but it will be unable to close them out completely or enter into matching positions for all open positions. If a counterparty of the Issuer defaults, then there is a risk that hedging transactions cannot be closed or have to be closed and need to be unwinded afterwards because of the counterparty's default. The risks arising in connection with trading in derivative securities issued by the Issuer may have a material adverse effect on the Issuer's liquidity and financial position.

This may have a significant impact on the value of the securities issued by the Issuer and may lead to a **total loss**.

Rights attached to the Securities

Mini Future Short (*Turbo Infini Put*) Warrants with knock-out enable investors to positively participate on a disproportionate (leveraged) basis in the negative performance of the underlying.

In return, however, they also adversely participate on a leveraged basis in any positive performance of the underlying and in addition bear the risk that the Mini Future Short (*Turbo Infini Put*) Warrant with knock-out may expire worthless or almost worthless immediately (knock-out event) if the observation price of the underlying reaches or exceeds the knock-out barrier at any time during the observation period within the observation hours.

In the event of exercise by the investor or following termination by the Issuer, in each case on a valuation date, the cash or termination amount received by the investors on the maturity date is the difference, multiplied by the multiplier, by which the reference price of the underlying determined on the valuation date is lower than the respective strike, converted into the settlement currency.

If the observation price of the underlying reaches or exceeds the knock-out barrier at any time during the observation period within the observation hours (knock-out time), the investor receives the stop-loss cash amount which is equal to the difference, multiplied by the multiplier, by which the hedge price is lower than the strike, provided that this amount is positive, converted into the settlement currency. The hedge price is a price determined by the Issuer in its reasonable discretion within 120 minutes following the occurrence of the knock-out time as the level of the underlying in line with the market, calculated taking into account the calculated proceeds from unwinding the corresponding hedging transactions. For this purpose, the hedge price is at

least equal to the highest price of the underlying determined within 120 minutes following the occurrence of the knock-out time. If the stop-loss cash amount is zero or negative, the Mini Future Short (*Turbo Infini Put*) Warrant expires worthless.

Ranking of the Securities

The Securities create direct, unsecured and unsubordinated obligations of the Issuer that rank *pari passu* in relation to one another and in relation to all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of obligations that have priority due to mandatory statutory provisions.

Restrictions on the free transferability of the Securities

The Securities are transferable, subject to selling restrictions, in accordance with the laws applying in each case and, where relevant, the respective applicable regulations and procedures of the depository agent in whose records the transfer is registered.

Where will the Securities be traded?

Application has been made to include the Securities to trading on Euronext Access, by Euronext Paris S.A., which is not a regulated market within the meaning of Directive 2004/39/EC starting from 28/12/2023.

What are the key risks that are specific to the Securities?

Risks with regard to the payment on Mini Future Short (*Turbo Infini Put*) Warrants

If exercised by the investor or terminated by the Issuer, investors receive on the maturity date as cash or termination amount the difference, multiplied by the multiplier, by which the reference price of the underlying determined on the valuation date is lower than the respective strike. If the reference price is equal to or higher than the strike, the Mini Future Short (*Turbo Infini Put*) Warrant expires worthless.

Security Holders bear a considerable risk that their Warrants will expire worthless before the end of their term. This is immediately the case if a knock-out event occurs. A knock-out event occurs if the relevant price of the underlying is equal to or rises above the knock-out barrier during the relevant barrier observation time. A knock-out event may also occur at times when the Warrants cannot be traded, for example on public holidays in the secondary market or when the usual trading hours of the underlying differ from those of the Warrants.

A knock-out event may also be triggered due to jumps in the price of the underlying. In particular, there is a risk that a sharp price movement in the underlying between the close of trading on the previous day and the opening of trading on the following trading day may trigger a knock-out event.

There is a risk that the unwinding of the Issuer's hedging positions could have a negative impact on the price of the underlying, thereby triggering a knock-out event.

The strike of the Warrants is subject to ongoing adjustment. As a result of such daily adjustment of the strike, the risk of a knock-out event occurring can increase.

In addition, the relevant knock-out barrier is adjusted by the Issuer in its reasonable discretion either for the respective following financing level adjustment period on an adjustment date or on any other day as specified in the relevant the Terms and Conditions. Investors should be aware that a knock-out event can also occur solely as a result of an adjustment of the knock-out barrier.

The stop-loss cash amount payable in the event of a knock-out is equal to the difference, multiplied by the multiplier, and converted where applicable into the settlement currency, between the strike of the Warrant and the hedge price of the underlying calculated by the Issuer. The hedge price of the underlying is a price determined by the Issuer in its reasonable discretion. Since this hedge price of the underlying calculated by the Issuer may also be considerably higher than the knock-out barrier, the Security Holder bears this so called gap risk.

Upon occurrence of a knock-out event, the stop-loss cash amount may also be zero if the hedge price calculated by the Issuer is at or above the strike at the relevant time after occurrence of a knock-out event. In addition, the Security Holder bears the risk that the reference price of the underlying on the relevant valuation date is at or above the strike of the Warrant. In both cases, the Warrant expires worthless. The Security Holder suffers an economical **total loss**.

Price change risk

The Security Holder bears the risk of strong price fluctuations of his Warrant. As a rule, the following applies: In the case of Warrants, rising prices of the underlying have a negative effect on the price of the Warrants. Other factors that as a rule have a negative impact on the price of a Warrant: A rising general level of interest rates, Interest rate spreads on the capital market for maturities comparable to the term of the relevant Warrant, Dividend expectation / dividend payments during the term of the Warrants.

In connection with the price fluctuations of a Warrant, the so-called **leverage effect** should be considered. If the price of the underlying rises, the price of the Warrant falls disproportionately sharply.

Investors' risk of loss also depends on the performance of the currency of the underlying

The risk of loss should the Warrants be exercised or expire or should the Warrants be sold during their term is not limited to the performance of the underlying to which the Securities are related to. Rather, unfavorable developments in the foreign exchange market may reduce the value of the Securities and increase the risk of loss. In particular, an unfavorable performance of the currency in which the underlying is expressed (reference currency) against the settlement currency may offset a positive performance of the underlying. Result: Although the price of the underlying has increased, the value of the Security decreases due to an unfavorable development on the foreign exchange market.

Risk due to extraordinary termination of the Securities

In the case of an extraordinary termination by the Issuer, the Security Holders are not entitled to payment of any amount to be calculated in accordance with the Terms and Conditions for the scheduled maturity on the basis of a redemption formula. In this case, the Issuer will determine the termination amount, if any, to be paid to the Security Holders at its reasonable discretion.

Risk of restrictions of the ability to sell the Securities due to market disruption events

Market disruption events may temporarily or permanently restrict the ability to sell the Securities, increase the cost of selling or introduce an additional price risk.

Market price risk

In particular, the following circumstances may affect the market price of the Securities. Individual market factors may also occur simultaneously and may be mutually reinforcing: Changes in the value of the underlying (including changes in the implied volatility of the underlying), Development of dividend payments or distributions on underlyings generally, General changes in interest rates and changes in the costs of holding the underlying, Distance of the underlying from any barriers or other relevant price thresholds, Exchange rate fluctuations and rising interest rates on the foreign currency money market, or changes in the creditworthiness or credit assessment of the Issuer.

Liquidity Risks

The secondary market for the Securities may be limited or the Securities may have no liquidity which may adversely impact the value of the Securities or the ability of the investor to dispose of them at a certain time at a certain price.

Security Holders bear the risk that there is no liquid market for trading the Securities on a stock exchange. This means that they cannot sell the Securities at a time desired by them.

Security Holders bear the risk that an adjustment of the Terms and Conditions may be made

The Terms and Conditions specify certain events upon the occurrence of which the Terms and Conditions may be adjusted. The Security Holder may suffer a loss of its capital amount spent on the acquisition of the Securities as a result of an adjustment; also, a possible loss of the Security Holder may be increased as a result of the adjustment.

Risk in connection with indices as the underlying

The performance of the index depends mainly on the individual index constituents included in the respective index. During the term of the Securities, however, their market value may also diverge from the performance of the index or of the index constituents.

Why is this prospectus being produced?

Use of the proceeds

The use of the proceeds serves solely the purpose of making profits and/or hedging certain risks of the Issuer. The net proceeds from the issuance of Securities will be used by the Issuer for its general business purposes.

Underwriting

The offer is not subject to a takeover agreement with a fixed takeover obligation.

Most material conflicts of interest pertaining to the offer or the admission to trading

The Issuer belonging to the Citigroup Inc. Group (Citigroup Inc. together with its subsidiaries the "**Citigroup Group**" or the "**Citigroup**") and the companies of the Citigroup Group operate daily on the international and German securities, foreign exchange, credit derivatives and commodity markets. They may therefore enter into transactions or business relations that may impact the price of the underlying or the constituents of the underlying and thus also the price of the Securities.

The Issuer and companies of the Citigroup Group may possess or obtain material, non-public information relating to the underlying or the constituents of the underlying. The Issuer and the companies of the Citigroup Group are under no obligation to disclose such information to the Security Holders.

Within the context of market making, the Issuer as market maker determines the price of the Securities to a decisive extent. The prices set by the market maker will not always correspond to the prices that would have been formed in liquid stock exchange trading. This activity can lead to conflicts of interest since the responsibilities of the calculation agent include making certain determinations and decisions which could have a negative effect on the price of the Securities or the level of the cash amount.

Quels sont les principaux risques propres à l'Émetteur ?

Insolvabilité et risque d'insolvabilité

L'insolvabilité et le risque d'insolvabilité procèdent, entre autres, de l'incapacité éventuelle de l'Émetteur à couvrir ses besoins

actuels et futurs, prévus et imprévus, en matière de trésorerie et de collatéral, et de son incapacité à obtenir des liquidités en quantité suffisante. L'insolvabilité et risque d'insolvabilité peuvent se matérialiser si des tiers qui doivent à l'Émetteur des sommes d'argent, des titres ou d'autres actifs sont défaillants dans l'accomplissement de leurs obligations. En outre, les variations des taux de change, de taux d'intérêt, de cours des valeurs mobilières et des matières premières négociables ainsi que des fluctuations de prix des biens et des dérivés peuvent entraîner des pertes. En particulier, en raison des risques susmentionnés, l'Émetteur peut se retrouver dans l'incapacité d'honorer ses obligations résultant des titres ou dans l'incapacité de les honorer pleinement ou à l'échéance. Si une procédure d'insolvabilité est ouverte à l'encontre de l'Émetteur, les investisseurs pourraient subir une **perte totale**.

Risques de négociation associés aux titres produits dérivés émis par l'Émetteur

L'Émetteur utilise des modèles de risque pour conclure des opérations de couverture qui lui servent à couvrir des positions ouvertes sur des titres émis. Dans ce contexte, il convient de mentionner les positions à risque résultant des mouvements de volatilité du sous-jacent ou les risques de décalage ou « *gap risk* » résultant des hausses soudaines du prix du sous-jacent. Au mieux, l'Émetteur peut dénouer de telles positions à risque dans une large mesure, mais il lui sera impossible de les dénouer totalement ou de conclure des positions inverses pour toutes les positions ouvertes. Dans le cas où une contrepartie de l'Émetteur fait défaut, il existe un risque que des opérations de couverture ne puissent être conclues ou doivent être conclues et aient besoin d'être dénouées ultérieurement en raison du défaut de contrepartie. Les risques liés à la négociation d'instruments dérivés émis par l'Émetteur peuvent entraîner un changement défavorable significatif sur sa liquidité et sa situation financière, ce qui peut avoir un impact important sur la valeur des titres émis par l'Émetteur et entraîner une **perte totale**.

Droits attachés aux Titres

Les Warrants Mini Future Short (*Turbo Infini Put*) à barrière de désactivante permettent aux investisseurs de participer de façon positive avec un effet de levier à la performance négative de la valeur sous-jacente.

En contrepartie, cependant, ils participent également de manière défavorable sur une base à effet multiplicateur à toute performance positive de la valeur sous-jacente en prenant en plus le risque que le Warrant Mini Future Short (*Turbo Infini Put*) à barrière désactivante perde sa valeur ou quasiment sa valeur immédiatement (événement désactivant) si le prix observé de la valeur sous-jacente atteint ou dépasse la barrière désactivante à tout moment pendant la période d'observation au cours des heures d'observation au cours des heures d'observation.

Lorsque l'investisseur fait jouer son droit d'exercice ou après clôture par l'Émetteur, dans les deux cas à une date d'évaluation, le montant en numéraire ou le montant de clôture reçu par les investisseurs à la date d'échéance est égal au déficit, multiplié par le coefficient multiplicateur, entre le prix de référence de la valeur sous-jacente à la date d'évaluation et le prix d'exercice correspondant converti dans la devise de règlement.

Si le prix d'observation de la valeur sous-jacente atteint ou dépasse la barrière désactivante à tout moment pendant la période d'observation au cours des heures d'observation (moment de désactivation), l'investisseur reçoit le montant stop-loss qui équivaut à la différence, multipliée par le coefficient multiplicateur, entre le prix de couverture et le prix d'exercice sous réserve que ce montant soit positif converti dans la devise de règlement. Le prix de couverture est un prix déterminé par l'Émetteur à sa discrétion dans des limites raisonnables dans les 120 minutes suivant la survenue de l'événement désactivant comme représentant le niveau de la valeur sous-jacente alignée sur le marché, calculée en tenant compte des bénéfices calculés du déboucement des transactions de couverture correspondantes. À cette fin, le prix de couverture est au minimum égal au prix le plus élevé de la valeur sous-jacente déterminé dans les 120 minutes suivant la survenue de l'événement désactivant. Si le montant stop-loss est nul ou négatif, le Warrant Mini Future Short (*Turbo Infini Put*) à barrière désactivante expire sans valeur.

Rang des Titres

Les Titres créent des obligations directes non garanties et non subordonnées de l'Émetteur qui se classent pari passu les unes par rapport aux autres et par rapport à toutes autres obligations actuelles et futures non garanties et non subordonnées de l'Émetteur, à l'exception des obligations qui ont priorité en raison de dispositions statutaires obligatoires.

Restrictions à la libre négociabilité des Titres

Sous réserve des restrictions de vente applicables, les Titres sont cessibles selon les lois s'appliquant à chaque cas et, le cas échéant, les réglementations et les procédures respectives applicables de l'agent dépositaire dans les livres duquel le transfert est enregistré.

Sur quel(s) marché(s) les Titres seront-ils cotés ?

Une demande a été déposée pour admettre les Titres à la négociation sur le Euronext Access, par Euronext Paris S.A., qui n'est pas un marché réglementé au sens de la Directive 2004/39/CE à compter du 28/12/2023.

Quels sont les principaux risques propres aux Titres ?

Risques liés au paiement de Warrants Mini Future Short (*Turbo Infini Put*)

Dans le cas d'un exercice de son droit par l'investisseur ou d'un exercice par l'Émetteur de son droit de résiliation, le montant en numéraire ou le montant de résiliation perçu par l'investisseur à la date d'échéance est égal à la différence, multipliée par le coefficient multiplicateur, par laquelle le prix de référence du sous-jacent déterminé à la date d'évaluation est inférieur au prix d'exercice correspondant. Si le prix de référence est égal ou supérieur au prix d'exercice, le Warrant Mini Future Short (*Turbo Infini Put*) expire sans valeur.

Les Détenteurs de Titres courent un risque considérable que leurs Warrants expirent sans valeur avant la fin de leur période de validité. C'est immédiatement le cas si un événement de knock-out survient. Un cas de knock-out survient si le prix du sous-jacent concerné est égal ou supérieur à la barrière désactivante durant la période d'observation de la barrière concernée. Un cas de knock-out peut également survenir à des moments où les Warrants ne peuvent pas être négociés, par exemple les jours fériés sur le marché secondaire ou lorsque les horaires habituels de négociation du sous-jacent diffèrent de ceux des Warrants.

Un cas de knock-out peut également survenir en raison de forte hausses du prix du sous-jacent. Une forte variation du prix du sous-jacent peut notamment déclencher un cas de knock-out entre la clôture des négociations la veille et l'ouverture des cours le lendemain.

Il y a un risque que le déboucement des positions de couverture de l'Émetteur puisse avoir un impact négatif sur le prix du sous-jacent et ainsi provoquer un cas de knock-out.

Le prix d'exercice des Warrants est régulièrement ajusté. Du fait de l'ajustement quotidien du prix d'exercice, le risque qu'un cas de knock-out se produise peut augmenter.

En outre, la barrière désactivante concernée est ajustée par l'Émetteur à son appréciation discrétionnaire raisonnable, soit pour la période suivante d'ajustement du niveau de financement à une date d'ajustement, soit tout autre jour tel que défini dans les Conditions Générales. Les investisseurs doivent être conscients qu'un cas de knock-out peut également se produire comme seul résultat d'un ajustement de la barrière désactivante.

Le montant stop-loss en numéraire payable lors de la survenance de l'cas de knock-out correspond à la différence, multipliée par le coefficient multiplicateur, et convertie si nécessaire dans la devise de règlement, entre le prix d'exercice du Warrant et le prix de couverture du sous-jacent calculé par l'Émetteur. Le prix de couverture du sous-jacent est fixé par l'Émetteur à son appréciation raisonnable. Dans la mesure où le prix de couverture du sous-jacent calculé par l'Émetteur peut être considérablement supérieur à la barrière désactivante, le Détenteur de Titres supporte également ce risque de gap.

À la survenance de l'cas de knock-out, le montant stop-loss en numéraire peut aussi être nul si le prix de couverture calculé par l'Émetteur est égal ou supérieur au prix d'exercice à l'heure appropriée après la survenance de l'cas de knock-out. De plus, le Détenteur de Titres court le risque que le prix de référence du sous-jacent à la date d'évaluation appropriée soit égal ou supérieur au prix d'exercice du Warrant. Dans les deux cas, le Warrant expire sans valeur. Le Détenteur de Titres subit une **perte économique totale**.

Risque lié au changement de prix

Le Détenteur de Titres supporte le risque de fortes fluctuations du prix de son Warrant. En règle générale, les règles suivantes s'appliquent : Dans le cas de Warrants, la hausse du prix du sous-jacent a un effet négatif sur le prix des Warrants. Autres facteurs ayant, en règle générale, un impact négatif sur le prix d'un Warrant : Une hausse niveau général des taux d'intérêt, Écarts de taux d'intérêt sur le marché des capitaux pour des échéances comparables à la durée du Warrant concerné, attente en matière de dividendes/paiements de dividendes pendant la durée des Warrants.

En ce qui concerne les fluctuations de prix d'un Warrant, il convient de tenir compte de l'**effet de levier**. Si le prix du sous-jacent augmente, le prix du Warrant baisse de manière disproportionnée.

Le risque de perte auquel s'exposent les investisseurs dépend également de la performance de la devise du sous-jacent

Le risque de perte dans le cas où les Warrants seraient exercés, expireraient ou seraient vendus avant leur arrivée à échéance, n'est pas limité à la performance du sous-jacent auquel les Titres font référence. Une évolution défavorable du marché des changes peut réduire la valeur des Titres et augmenter le risque de perte. En particulier, une performance défavorable de la devise dans laquelle le sous-jacent est exprimé (devise de référence) par rapport à la devise de règlement peut compenser une performance positive du sous-jacent. Résultat : Bien que le prix du sous-jacent ait augmenté, la valeur du Titre diminue en raison de l'évolution défavorable du marché des changes.

Risques liés à la résiliation extraordinaire des Titres

En cas de résiliation extraordinaire par l'Émetteur, les Détenteurs des Titres ne peuvent prétendre au versement du montant calculé conformément aux Conditions Générales pour l'échéance prévue sur la base d'une formule de rachat. Dans ce cas, l'Émetteur fixera à son appréciation raisonnable le montant de résiliation éventuel à verser aux Détenteurs de Titres.

Risques de restrictions sur la capacité à vendre les Titres en raison d'événements perturbant le bon fonctionnement des marchés

Des événements perturbant le bon fonctionnement des marchés peuvent restreindre de manière temporaire ou permanente la capacité à vendre les Titres, accroître le coût de leur vente ou créer un risque de prix supplémentaire.

Risques liés à la valeur de marché des Titres

En particulier, les circonstances suivantes peuvent affecter le prix de marché des Titres. Des facteurs de marché individuels peuvent survenir simultanément et se renforcer mutuellement : Évolution de la valeur du sous-jacent (y compris les variations de la volatilité implicite du sous-jacent), Développement des paiements de dividendes ou de distributions sur des sous-jacents en général, Changement général des taux d'intérêt, et changement s des coûts de détention du sous-jacent, Distance du sous-jacent par rapport à toute barrière ou autre seuil de prix pertinent, Fluctuations des taux de change et hausse des taux d'intérêt sur le marché monétaire des devises étrangères ou Évolution de la solvabilité ou de la note de crédit de l'Émetteur.

Risques de liquidité

La taille du marché secondaire pour les Titres peut être limitée ou les Titres peuvent se révéler illiquides, ce qui peut impacter négativement la valeur des Titres ou la capacité de l'investisseur à les céder à un certain moment à un certain prix.

Les Détenteurs de Titres sont exposés au risque qu'il n'y ait pas de marché liquide pour négocier les Titres sur une bourse de valeurs mobilières. Cela signifie qu'ils ne peuvent pas vendre les Titres au moment qu'ils souhaitent.

Les Détenteurs de Titres supportent le risque qu'un ajustement des Conditions Générales soit effectué

Les Conditions générales précisent certains événements à la survenance desquels les Conditions Générales peuvent être ajustées. Le Détenteur de Titres peut subir une perte du montant de son capital dépensé pour l'acquisition des Titres à la suite d'un ajustement ; de même, une perte éventuelle du Détenteur de Titres peut être augmentée à la suite de l'ajustement.

Risque lié aux indices en tant que sous-jacent

La performance de l'indice dépend principalement des valeurs constitutives incluses dans l'indice respectif. Cependant, pendant leur durée de vie, la valeur de marché des Titres peut diverger de la performance de l'indice ou des valeurs constitutives de l'indice.

Pourquoi publions-nous ce Prospectus ?

Utilisation du produit de la vente

Le produit de la vente sert exclusivement à réaliser des profits et/ou à couvrir certains risques de l'Émetteur. L'Émetteur utilisera le produit net issu de l'émission des Titres pour financer ses activités.

Souscription

L'offre n'est soumise à aucun accord de rachat prévoyant des modalités de rachat fermes.

Principaux conflits d'intérêts relatifs à l'offre ou à l'admission à la négociation

L'Émetteur, qui appartient au groupe Citigroup Inc. (Citigroup Inc. et ses filiales étant conjointement dénommées le « **Groupe Citigroup** » ou « **Citigroup** »), et les sociétés du Groupe Citigroup opèrent quotidiennement sur les marchés allemands et internationaux des valeurs mobilières, des changes, des dérivés de crédit et des matières premières. Ils peuvent donc conclure des transactions ou nouer des relations commerciales qui peuvent avoir un impact sur le prix du sous-jacent ou sur les éléments constitutifs du sous-jacent et, partant, sur le prix des Titres.

L'Émetteur et les sociétés du groupe Citigroup peuvent posséder ou obtenir du matériel, des informations de nature non publique se rapportant au sous-jacent ou à des éléments constitutifs du sous-jacent. L'Émetteur et les sociétés du groupe Citigroup ne sont pas tenus de les dévoiler aux Détenteurs de Titres.

Dans le contexte de la tenue du marché, l'Émetteur, en tant que teneur de marché, fixe le prix des Titres de manière décisive. Les prix fixés par le teneur de marché ne correspondront pas toujours aux prix qui se seraient formés sur des bourses de valeurs mobilières liquides. Cette activité peut entraîner des conflits d'intérêt dans la mesure où les responsabilités de l'agent de calcul comprennent certaines décisions qui pourraient avoir un effet négatif sur le prix des Titres ou le niveau du montant en numéraire.
